**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 MARCH 2019**

---

**1 Statement of Significant Accounting Policies**

The financial statements cover Nucleus Software Australia Pty Ltd as an individual entity. Nucleus Software Australia Pty Ltd is a company limited by shares, incorporated and domiciled in Australia.

**Basis of Preparation**

The financial statements are special purpose financial statements that have been prepared in accordance with Australian Accounting Standards, Australian Accounting Interpretations, other authoritative pronouncements of the Australian Accounting Standards Board (AASB) and the Corporations Act 2001.

The significant accounting policies used in the preparation and presentation of these financial statements are provided below and are consistent with the prior reporting period unless stated otherwise.

The financial statements are based on historical costs.

**Financial Instruments**

Financial instruments are recognised initially using trade date accounting, i.e. on the date that company becomes party to the contractual provisions of the instrument.

On initial recognition, all financial instruments are measured at fair value plus transaction costs (except for instruments measured at fair value through profit or loss where transaction costs are expensed as incurred).

**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 MARCH 2019**

---

**Impairment of Non-Financial Assets**

At the end of each reporting period the company determines whether there is any evidence of an impairment indicator for non-financial assets.

Where this indicator exists and regardless for goodwill, indefinite life intangible assets and intangible assets not yet available for use, the recoverable amount of the assets is estimated.

Where assets do not operate independently of other assets, the recoverable amount of the relevant cash-generating unit (CGU) is estimated.

The recoverable amount of an asset or CGU is the higher of the fair value less costs of disposal and the value in use. Value in use is the present value of the future cash flows expected to be derived from an asset or cash-generating unit.

Where the recoverable amount is less than the carrying amount, an impairment loss is recognised in profit or loss.

Reversal indicators are considered in subsequent periods for all assets which have suffered an impairment loss, except for goodwill.

**Cash and Cash Equivalents**

Cash and cash equivalents comprises cash on hand, demand deposits and short-term investments which are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

**Revenue and Other Income**

Revenue is recognised when the amount of the revenue can be measured reliably, it is probable that economic benefits associated with the transaction will flow to the entity and specific criteria relating to the type of revenue as noted below, have been satisfied.

Revenue is measured at the fair value of the consideration received or receivable and is presented net of returns, discounts and rebates.

**Interest revenue**

Interest revenue is recognised using the effective interest rate method.

**Rendering of services**

Revenue in relation to rendering of services is recognised only when it can be measured reliably. If this is the case then the stage of completion of the services is used to determine the appropriate level of revenue to be recognised in the period.

**Comparative Amounts**

Comparatives are consistent with prior periods, except for the statement of comprehensive income in which some expenses have been reclassified for reporting purposes.
